

C\_ExpectCovarInfluence

```
graph LR; R[R_ExpectCovarInfluence] --> C[C_ExpectCovarInfluence]; R --> ncol[ncol]; R --> nrow[nrow];
```

The diagram illustrates a central node, R\_ExpectCovarInfluence, which is shaded gray and has three outgoing arrows. One arrow points diagonally up and to the right to the node C\_ExpectCovarInfluence. A second arrow points horizontally to the right to the node ncol. A third arrow points diagonally down and to the right to the node nrow. All nodes are rectangular boxes with black outlines and black text.
