

1. Index of Example Files

The following is a list of the example files that illustrate and test various features of AeB Pro.

1. `aebpro_ex1.tex`: Illustrates the document and page open/close actions and fullscreen support of AeB Pro.
2. `aebpro_ex2.tex`: Demonstrates the features of the `pro` option of the `web` package, including enhanced control over the layout of section headings and the title page.
3. `aebpro_ex3.tex`: Highlights the attachments options and the doc assembly methods.
4. `aebpro_ex4.tex`: A discussion of layers, rollovers and animation.
5. `aebpro_ex5.tex`: Linking to attachments: The `\ahyperref`, `\ahyperlink` and the `\ahyperextract` commands.
6. `aebpro_ex6.tex`: Learn how to create a PDF Package out of your attachments.
7. `aebpro_ex7.tex`: Explore the `\DeclareInitView` command, documentation included in this file.
8. `aebpro_ex8.tex`: Details of how to use unicode to set the initial value(s) of field, or as captions on a button.
